VIRAJ PATIL

Senior Full Stack Developer | AI-Assisted / AI-Native Development | WordPress | PHP | REST APIs

virajpatil79@gmail.com | +91 9867153067 | Mumbai, India | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Senior Full Stack Developer with extensive hands-on experience building, modernizing, integrating, and supporting enterprise web platforms across WordPress, PHP, MySQL, JavaScript, React, Shopify, and REST APIs. Strong agency background delivering client-facing websites, custom themes and plugins, API-driven applications, payment and CRM integrations, performance optimization, security remediation, production troubleshooting, and deployment workflows. Currently focused on AI-assisted engineering and product development, using ChatGPT, Claude, Cursor, and GitHub Copilot to accelerate implementation, debugging, documentation, and solution delivery while retaining ownership of architecture, quality, security, and technical decisions.

CORE COMPETENCIES

Full-Stack Web Development • WordPress Development & Architecture • PHP & MySQL • REST API & Third-Party Integrations • Custom Themes, Plugins & ACF • React.js & Vite • GitHub, Git & CI/CD Workflows • Performance & Core Web Vitals • Security & VAPT Remediation • Production Support & Troubleshooting • Payment / CRM / Webhook Integrations • Requirements Discovery & Technical Planning • Client & Non-Technical Stakeholder Communication • Agency Multi-Project Delivery • AI-Assisted Development

TECHNICAL SKILLS

Web / Backend: PHP, MySQL, JavaScript, jQuery, HTML5, CSS3, REST APIs, JSON, XML, authentication, token-based integrations, webhooks

WordPress: WordPress architecture, custom themes, custom plugins, ACF, Gutenberg, custom post types, Headless WordPress, performance, hardening

Frontend: React.js, Vite, Bootstrap, responsive UI, accessibility-aware UI/UX, PageSpeed, Lighthouse

Commerce / Platforms: Shopify, WooCommerce, payment integrations, CRM integrations

Performance / Security: Core Web Vitals, caching, database/query optimization, PageSpeed, Lighthouse, WordPress hardening, VAPT remediation

DevOps / Delivery: Git, GitHub, GitHub Actions, branching, staging/production workflows, deployment, Postman, VS Code

AI-Assisted Engineering: ChatGPT, Claude, Cursor, GitHub Copilot, AI-assisted coding, debugging, code review, technical documentation

PROFESSIONAL EXPERIENCE

INDEPENDENT WEB & PRODUCT DEVELOPMENT | *Independent Developer / Product Development* | *Jun 2026 – Present* | *Mumbai / Remote*

- Build and modernize WordPress, React, and API-driven products while pursuing senior full-time, consulting, and contract opportunities.
- Built and published TickerHQ, a commercial WordPress plugin for configurable market-data ticker widgets.
- Built an IPO Dynamic Platform using external financial APIs, token-based authentication, dynamic data, and WordPress URL/rewrite architecture.
- Built StockPulse, a React and Vite market dashboard with API-driven functionality and responsive application architecture.
- Use AI coding tools to accelerate implementation, debugging, refactoring, documentation, and iterative product development.

PURETECH DIGITAL | *Business Manager* | *Mar 2008 – May 2026* | *Mumbai, India*

- Led hands-on technical delivery across WordPress, PHP, MySQL, REST APIs, custom CMS solutions, integrations, performance, security, and production support.
- Built and maintained custom WordPress themes, plugins, CMS modules, and API-driven solutions for enterprise and client-facing platforms.
- Delivered CRM, payment, financial, OTP, webhook, and third-party API integrations, including authentication and token-based workflows.
- Diagnosed production issues across application, database, hosting, plugin, performance, and security layers; translated findings into practical fixes.
- Worked across multiple client projects in an agency environment, balancing delivery speed, maintainability, quality, and stakeholder communication.
- Coordinated technical changes, testing, and production-facing fixes across web projects.

ADLABS FILMS LTD. | *Senior Developer / Technical Coordinator* | *Jan 2006 – Jan 2007* | *Mumbai, India*

- Delivered web development and technical coordination across application updates, issue resolution, and stakeholder requirements.
- Supported website changes, troubleshooting, and day-to-day development activities.

GODREJ INFOTECH LTD. | *Web Developer* | *Jan 2005* | *Mumbai, India*

- Contributed to web development, maintenance, and technical implementation in a professional enterprise environment.

DELIVERY HIGHLIGHTS

- Enterprise web delivery across WordPress, PHP, MySQL, REST APIs, custom CMS components, and client-facing platforms.
- Production ownership across performance optimization, security remediation, plugin issues, database/query troubleshooting, and deployment workflows.
- Integration-heavy delivery across CRM, payment, financial, OTP, webhook, and third-party API workflows.
- AI-assisted engineering workflow using ChatGPT, Claude, Cursor, and GitHub Copilot for implementation, debugging, review, documentation, and faster iteration.
- Agency delivery across multiple concurrent projects with direct stakeholder communication and practical technical decision-making.

SELECTED PROJECTS

TickerHQ — Commercial WordPress plugin for configurable market-data ticker widgets; productized development, API data integration, widget UI, and WordPress.org distribution.

IPO Dynamic Platform — API-driven WordPress platform using token authentication, dynamic financial data, custom rewrite architecture, and SEO-friendly URL patterns.

StockPulse — React + Vite market dashboard using API-driven data, responsive UI architecture, routing, state management, and charting.

EDUCATION

Bachelor of Commerce (B.Com) | University of Mumbai
